# NAÏADE HOT SKIN SWIMSUIT

The Naïade Shorty/Swimsuit is surprisingly effective for a thickness of only 0.5mm! It keeps in your body heat thanks to its titanium leaf fabric. The Naïade shorty shape swimsuit is a development of the famous OTARIE swimsuit. It covers the shoulders and thighs well. Hotskin is also used for Surfing - Windsurfing – Light sailing...

**Fabric :** Hot Skin

Hot Skin : A surprising compound made up of 5 layers for a width of only 0.5 mm. The outer jersey makes the swimsuit highly resistant. The first thermal barrier is provided by a Titanium layer. The Chloroprene (Neoprene) offers insulating properties. The internal Titanium layer keeps in body heat by reflection. The SCS (Smooth Composite Skin) is in direct contact with the skin. This material is really extraordinary. It is hydrophobic (does not absorb moisture)!

**Colours :** BLACK

**Sizes :** 1, 2, 3, 4, 5, 0,
