

# NEPTUNE FLOTATION WAISTCOAT - iso 12402-5

**PPE Category 2**

**EN ISO 12402-5 :2006 + A1**

**:2010 - Personal flotation device - Part 5: 50 N buoyancy aid**

**Buoyancy aid waiscoat.** Registered design.

**It has 4 other important strengths as regards safety :**

- Crotch strap keeping the jacket at your waist!
- Handle on the back for holding the person
- Reflective strips on the back and shoulders!
- It does not restrict movement and can be worn permanently.

**Composition:** Closed-cell PVC foam guaranteeing good buoyancy that lasts.

*For maximum protection, make sure you choose the appropriate size for your comfort and survival.*

*Try on the jacket in a swimming pool to familiarise yourself with how it works and how it behaves in the water. Closed-cell foam remains buoyant for a long time when used normally and does not require any particular care. **Do not use the jacket if it is damaged.***

**Fabric :** Coated polyamide

Coated polyamide fabric. Generally with a warm lining, this fabric has proved itself for many years. Very light and strong. 100% polyamide + PU Coated. High-performing fabric both for its hard-wearing and its breathable characteristic. Suitable for all outdoor activities. Total weight: 155 g/m<sup>2</sup> in the version used by most. Mesh lining: 100% polyamide - 80 g/m<sup>2</sup> (±5%).

**Colours :** ORANGE/BLACK

**Sizes :** XS, S, M, L, XL, XXL,
