

BIB FISHING

- The Bib Fishing is completely watertight (+10000 mm), breathable (Ret<15) and acts as a windcheater. The seams are thermal bounded taped to make them waterproof.
- The Bib Fishing can be worn effectively with the Top Fishing Smock.
- It is sufficiently high to protect the bottom of the back and prevent any air ingress.
- Elastic sides ensure that the clothing fits well so that air does not pass.
- The large elastic braces are comfortable on the shoulder. They can be adjusted to suit all sizes.
- The large-teeth zip and large gusset prevent water ingress and make it easier to slip on.
- It has a watertight pocket closing with a self-grip flap on the thigh, where objects can be placed to protect them from the water.
- There is an eyehole at the bottom of the pocket for water evacuation.
- Ankle adjustment tabs flatten fabric on legs to fit in boots and improve waterproofing.
- The bib is completely lined in polyamide to make use comfortable.

Fabric : Aquastar

Aquastar Fabric is a breathable waterproof microporous polyamide coating. Its weight, 200 g/m makes it a hard-wearing and comfortable fabric. It is waterproof (+10000 mm) and breathable (Ret<15). 1725 lining: 100% polyester - 68g/m² (±5%)
